

Register a researcher profile

Use researcher-portal.html to create and submit a public researcher profile.

Researcher portal

Host faculty / PI

Verified before public

1 Open Portal

Go to researcher-portal.html and create an account with a SUT email.

2 Verify Email

Open the email confirmation link, then sign in to the researcher portal.

3 Identity

Enter name, researcher type, contact details, and active status.

4 Host and Group

Select host faculty or PI and the lab or research group. Use TBD if unknown.

5 Research Profile

Add project, funding, dates, up to five interests, skills, and a short bio.

6 Submit

Save the profile for host faculty or registry manager review.

BEFORE REGISTERING

Prepare these details

Researchers create their own account and submit their profile. The selected host faculty or a registry manager verifies it before publication.

- ☒ SUT email and password
- ☒ Full name and researcher type
- ☒ Host faculty or PI, or TBD
- ☒ Research lab or group
- ☒ Project, funding, and dates
- ☒ Photo, interests, skills, and bio

7

Verification comes next

The researcher can keep editing their profile, but it appears publicly only after host faculty or manager verification and public approval.

DIRECT PAGES [researcher-portal.html](#) | [researchers.html](#) | [admin.html](#)

Verify and publish profiles

Host faculty verify their own researchers. Registry managers can also review records and publish them to the public directory.

PUBLIC RULE

Verified + public

The public Researchers page shows only profiles with review status Verified and Show on public Researchers page selected.

RECORD FIELDS

What can be maintained

Identity

Host / PI

Group

Project

Dates

Bio

A

Host Review

The selected host faculty can see, edit, verify, and publish their connected researcher records.

1

Draft

private working record

2

Submitted

host or manager review

3

Verified

can publish publicly

B

Manager Review

Registry managers can check submitted profiles, correct records, verify, publish, or export CSV.

PUBLIC PAGE FILTERS

Browse researchers

Visitors can filter public profiles by role type, host faculty, lab or group, and status.
